Fraser Sensory Kit 	Individuals of all ages who benefit from using sensory tools to modify the environment.	A curated set of sensory tools in a drawstring backpack, including noise-reducing headphones, fidgets, and visual and communication tools. Designed to support regulation for individuals with sensory differences in various environments. Easy to transport and adaptable for a range of settings.	5
Noise-reducing Headphones 	Individuals of all ages who are sensitive to noise; ideal for use at loud events and busy public spaces.	Over-ear headphones that passively reduce ambient noise, helping to prevent overstimulation and support regulation. Not intended for audio use. Best worn during high-volume events, transitions, or while focusing in noisy environments. Adjustable sizing makes them suitable for a wide age range.	5
Reusable Silicone Earplugs 	Teens and adults who need subtle, comfortable sound reduction; ideal for concerts, crowded spaces, or prolonged sensory exposure.	Discreet earplugs made of soft silicone, designed to lower volume without blocking all sound. Loop-style design makes them easy to insert, wear, and remove. They help users stay engaged while reducing auditory input. Not recommended for children under 12 without supervision.	5
